

future and therefore invest in smaller, still young and highly innovative companies, called start-up companies (see [<< 1.2 Targets and Strategy >>](#)). Further investments were thus made in several young and innovative companies in the 2022 financial year. The focus of these investments is on certain areas of innovation: artificial intelligence, reality capture, communication, and digitalization. Furthermore, cooperations and partnerships with colleges of technology and universities are part of the company's DNA and are thus being gradually developed further; see [<< 3.2 Business Performance in 2022 and Key Events Influencing the Company's Business Performance >>](#).

2 Nonfinancial Statement

General Information

The Nemetschek Group has integrated its non-financial Group Statement into the Group's Annual Report. In accordance with Section 317(2) of the German Commercial Code (Handelsgesetzbuch, HGB), the non-financial Group Statement is not subject to a statutory audit. Auditing firm PricewaterhouseCoopers GmbH, Wirtschaftsprüfungsgesellschaft (PwC), Munich, subjected the non-financial Group Statement of the Nemetschek Group to a limited-assurance audit. The Supervisory Board has also examined this statement and reached the conclusion that there are no grounds for reservations.

This section of the Group Management Commentary contains the Nemetschek Group's Group Nonfinancial Statement based on the German CSR Directive Implementation Act (CSR-RUG), which came into effect on January 1, 2017. Based on the requirements set forth in section 315c in conjunction with sections 289c to 289e of the HGB, a company must transparently describe in detail its key non-financial activities within the Nemetschek Group, in relation to five aspects specified in the law: respect for human rights, combating corruption and bribery, employee concerns, environmental concerns, and social concerns. In accordance with Article 8 of Regulation (EU) 2020/852 of the European Parliament and of the Council of the European Union (EU Taxonomy Regulation) of June 18, 2020 on establishing a framework to facilitate sustainable investments and amending Regulation (EU) 2019/2020, the Nemetschek Group discloses in this non-financial statement whether and to what extent the Group's activities are associated with economic activities that qualify as environmentally sustainable. Information on this is included in section [<< 2.3 EU Taxonomy >>](#) of this Nonfinancial Statement.

The Nemetschek Group did not apply an external framework for the preparation of its Nonfinancial Statement for the 2022 fiscal year, for reasons including the major changes in the regulatory environment at present. Instead, the existing reporting structures were used like in previous years. Having said this, there is currently a general effort underway to align the Group's sustainability reporting with the standards of the Global Reporting Initiative (GRI Standards). For example, the materiality analysis carried out and also the implementation of the management approaches are based on the GRI standards. The Nemetschek Group will, in the future, use the European Sustainability Reporting Standards (ESRS) to meet the requirements of the Corporate Sustainability Reporting Directive (CSRD). The company has launched corresponding initiatives for their implementation and intends to have them completed by the 2024 reporting period.

To improve readability, the masculine form is used for the majority of personal nouns in this non-financial Group statement. This does not imply any discrimination against the other gender but is intended to be understood as gender-neutral in the interests of linguistic simplification.

The Nemetschek Group's business model is described in section [<< Group Business Model >>](#) of this Group Management Commentary.

2.1 Sustainability at the Nemetschek Group

Approach to Sustainability

The Nemetschek Group places considerable importance on good corporate governance and social and environmental responsibility. The Group aims to increase efficiency and productivity across the entire value chain of the construction industry through its software solutions. These solutions cover the complete workflow in the life cycle of a construction or infrastructure project, from the first sketch to the construction and operation of the property. Architects, engineers of various disciplines, building contractors, property developers, property managers, and building managers can use the Nemetschek Group's software solutions to design, build, and manage properties digitally and efficiently throughout the building life cycle.

We focus on acting sustainably not only in the development of our software solutions, but also in relation to how we treat our employees and approach our role in society. For this reason, the Nemetschek Group has defined standards in its Code of Conduct for the way in which it conducts day-to-day business. The Code of Conduct is regularly reviewed to ensure it is current and revised accordingly. It was last updated in late 2021 and specifically states:

"Each of us contributes to the public image of the Nemetschek Group through our appearance, conduct, and actions. We are all responsible for ensuring that we, as the Nemetschek Group, live up to our global legal and social responsibility."

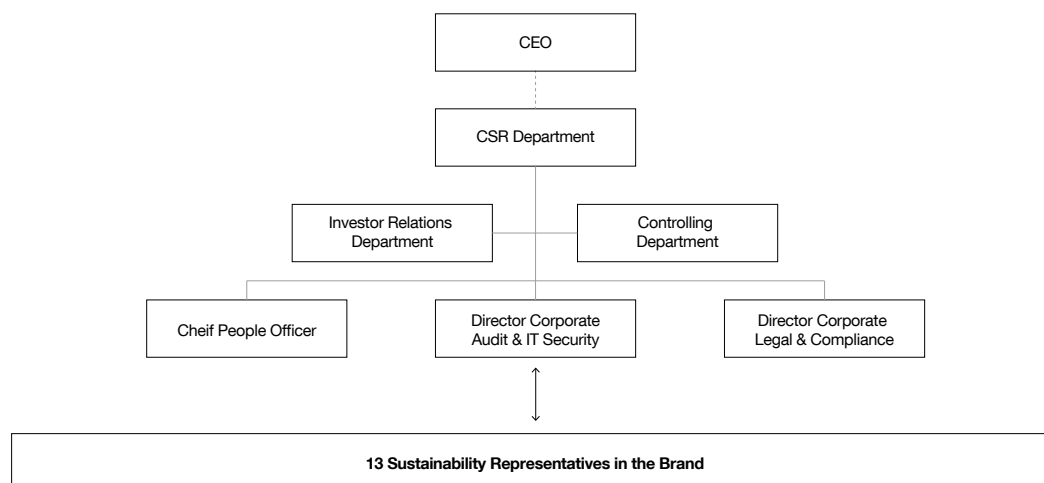

The Code of Conduct states that the Nemetschek Group does not tolerate any form of discrimination or harassment, nor corruption of any kind. Furthermore, each and every employee is required to use all resources sparingly and in an environmentally friendly manner in everyday working life. Employee responsibility also plays a significant role.

Beyond its own organization, the Nemetschek Group also has its suppliers commit to a "Supplier Code of Conduct" for suppliers and business partners, for example. This particular code of conduct provides guidelines that include the fundamental principles of the International Labour Organization (ILO), among other things. Further information on these two topics is provided in section [<< Integrity and Compliance >>](#).

Sustainability Structures within the Company

There are standards applicable across the Group that provide the basis for sustainability-related activities. They cement sustainability as an integral part of all business practices of the Nemetschek Group. The Sustainability department and the cross-functional Core Sustainability Team identify sustainability-related topics and coordinate the implementation of the corresponding measures. The Sustainability department maintains close contact with the Executive Board in this regard. The Chief Executive Officer (CEO) has held responsibility for sustainability within the Executive Board since March 1, 2022, prior to this date, the Chief Financial & Operations Officer (CFFOO) was responsible. The CEO engages intensively with the Sustainability department about the progress on relevant activities within the company, usually once per quarter, and discusses the next steps to take. Furthermore, the Executive and Supervisory Boards are kept abreast of key developments within the Sustainability department with a written report every six months. The regular reporting to and dialog with Executive and Supervisory Board focuses in particular on the key topics identified through the Materiality Analysis, which is described below, and the development of these topics.

SUSTAINABILITY STRUCTURES IN THE GROUP

Because the Nemetschek Group consists of 13 brands, many of the non-financial issues are also still managed by the brands independently. However, to coordinate the activities and align them across the company, the sustainability representatives at all brands have held discussions every six months on matters such as best practices, the ongoing development of the future sustainability strategy, and non-financial risk since 2021. The designated points of contact are the driving force for the relevant issues within their brand and are tasked with exchanging information with Nemetschek SE as well as with their colleagues at their brand and beyond.

Material Risks

The Nemetschek Group examines not only the main risks for its business activities but also risks that could have a significant negative impact on the concerns defined for nonfinancial reporting (HGB section 315c in conjunction with Section 289c (3) Nos. 3 and 4). The risk assessment involves recording the gross risk values for the amount of loss and probability of occurrence as far as possible, as well as the net risk positions remaining after risk-mitigating measures.

Similarly, to the previous year, no material risks that would very likely have serious effects were identified for 2022 for the topics defined in the non-financial reporting. Consequently, there remained no risks for 2022 that, on a net basis, meet the materiality criteria under HGB Section 289c (3) Nos. 3 and 4. This risk assessment was coordinated with the sustainability representatives for the brands during the reporting period.

Materiality Analysis

To align sustainability-related efforts with the interests of stakeholders, an extensive materiality analysis was carried out most recently in 2021. The Nemetschek Group has performed materiality analyses every other year since 2017. In the years between, including 2022, the detailed materiality analysis an assessment on major changes and validity of the defined material topics was made. The current assessment did not result in any adjustments to the defined material topics of the group. The materiality analysis is planned to be performed again for the 2023 fiscal year.

In the course of this materiality analysis, a variety of external frameworks such as the GRI Standards and various ESG and sustainability ratings were first used to assess how current and relevant selected topics were. Then, roughly 850 internal and external stakeholders were consulted to identify material topics and their relevance to the Group's business and to evaluate the impacts on the environment, employees, and society. Weighting the individual results ensured that the overall result was representative. The Core Sustainability Team concluded the process by discussing and validating the ranking of the issues at a final workshop. These results were presented to the Executive Board and subsequently reported to the Supervisory Board.

The following table shows the topics that were identified as material and their allocation to our overarching fields of action and concerns under the CSR-RUG.

FIELDS OF ACTION AND MATERIAL TOPICS

Field of Action ("concern" under CSR-RUG)	Material Topics at Nemetschek Group
Employees & Society (Social Issues and Employees)	<ul style="list-style-type: none"> » Attracting and retaining employees » Training and education » Employee health » Diversity and inclusion » Customer relationships » Partnerships with colleges of technology and universities
Environment & Climate (Environment)	<ul style="list-style-type: none"> » Environmental and social effects of products
Integrity & Compliance (Human Rights and Combating Corruption)	<ul style="list-style-type: none"> » Fair business practices and anti-corruption » Anti-discrimination » Data protection and information security

2.2 Key Non-financial Issues**Employees and Society**

At the Nemetschek Group, the focus is on employees. The Nemetschek Group believes that satisfied, successful, and healthy employees are crucial to sustainable business development. The Group's management maintains an open dialog with all employees at all levels and has set priorities and directions for HR work in the company. The most important goals remain the same, namely, to create the best possible environment, to attract the best talent to the company and retain it, to offer equal opportunities, and to treat everyone with the utmost respect and appreciation. However, this social responsibility is not limited to only the employees at the Group. It also applies to clients, partners, and society as a whole. The Nemetschek Group Code of Conduct states the importance of acting responsibly in relation to all our stakeholders.

Management Approach – Employee Responsibility

In addition to the Nemetschek Group Code of Conduct, the People Letter of Commitment defines basic standards and requirements for key issues affecting employees. They include core instruments for employee recruitment and development. Regular employee development conversations between employees and their manager as well as programs for supporting employee health are just two examples from these fields. The revision of the People Letter of Commitment in the 2021 fiscal year strengthens the focus on diversity and employee well-being.

To act quickly and agilely in the respective markets and regions, the individual brands manage their HR affairs independently. As a result, important areas such as gaining and retaining employees, education and training, employee health, and diversity and inclu-

sion are managed in a decentralized manner by the brands. Owing to in particular regional differences of the labor markets in which our brands are active, the brands are also free to define brand-specific standards and to develop their own HR guidelines that go beyond the minimum requirements stated in the "People Letter of Commitment" or govern additional topics.

The Human Resources department of Nemetschek SE supports and advises the HR departments of the individual brands in this respect. The Chief People Officer (CPO) is responsible for the Personnel department within Nemetschek SE and reports to the CEO. Furthermore, there is a reporting line between the CPO and the HR managers at the individual brands, ensuring regular and close communication on matters such as new projects and important Group-wide HR issues. Various expert and project committees are also convened as required to deal with specific topics. On top of that, the HR departments within the Nemetschek Group maintain close, cross-brand exchange on topics that are important for the present day and the future.

The Nemetschek Group's values are characterized by open and transparent communication. For instance, there are the Group-wide, virtual "NEMunplugged" employee events which were launched in the 2021 fiscal year. These quarterly events – now taking place in a hybrid format - introduced new members of the workforce's management and provided an overview of the current Group-wide activities and of the Group's strategic direction during the 2022 fiscal year, among other things. Moreover, the Executive Board sketches out the current development of the business and further data and facts on the Group and its segments on a regular basis.

Gaining and Retaining Employees

Attracting and retaining highly qualified and highly motivated employees is one of the keys to success for the entire software industry. The shortage of skilled IT workers has been heightened by the Covid-19 pandemic and also affects enterprises like the Nemetschek Group. The AEC/O market and the media & entertainment industry are characterized by a high speed of innovation. When it comes to finding skilled and highly talented workers, the Nemetschek Group must compete with businesses of comparable structures and sizes as well as international corporations such as Microsoft, Apple, and Google.

Attractive working conditions and a positive working environment help attract the best talent to the Nemetschek Group and retain them in the Group. An important goal of our human resources work is to develop our workforce size in such a way that the Group's targeted growth potential can be realized and is not limited by freight labor shortages. The Nemetschek Group uses the development of the number of its employees and staff turnover as an indicator of the success of its measures. It plans to also set targets for gaining and retaining employees in the medium term in connection with its ongoing development of sustainability-related activities. In particular, the methods used by the Nemetschek

Group's brands for actively finding employees include social-media platforms such as Xing and LinkedIn as well as recommendations from its own employees.

To retain skilled employees and managers in the long term, the Nemetschek Group keeps working on strengthening its appeal as an employer. Flexible working time models, which are laid down as a standard in the People Letter of Commitment, contribute to this, too. Some brands have also developed their own, additional rules in this area. On a general basis, all brands support remote working, for example, and equip their employees accordingly. The structure of the individual working time models depends on the business model of the respective brand.

In 2022, the number of employees in the Nemetschek Group increased by 268 or 8.4% compared with the previous year. As at December 31, 2022, the Nemetschek Group employed 3,448 people (previous year: 3,180). Employee turnover, which is defined as non-company-initiated employee departures in relation to the total headcount, was 9.09% in 2022 (2021: 9.42%; 2020: 7.46%; 2019: 7.79%).

Education and Training

The Nemetschek Group relies on continuous training and further education. As a company that uses and drives forward digitalization, the Nemetschek Group also offers young people in particular good long-term prospects. Young talents can develop in the company and grow into management tasks. The overriding goal of our training and further education activities is to support our employees in technical and personality-building topics and thus to create the possibility that we develop experts and managers from the ranks of our junior staff. LinkedIn Learning was introduced at Group level in fiscal 2021, in which all brands can participate. In the reporting year, as in the previous year, almost 2,000 employees took advantage of the offer and selected their training individually. In addition to specialist training measures, topic-related Learning Challenges with different video content are also made available via the intranet every month. For example, in fiscal 2022, Learning Challenges on the topics of „Diversity, Equity, Inclusion & Belonging,“ „Managing one's own energy reserves in everyday working life,“ and „Environmental protection“ were offered and used by employees. In addition, leadership and expert training is also offered in the individual brand companies of the Nemetschek Group. This is intended to create the opportunity for employees to develop into managers on the one hand, but also to support and promote expert careers on the other.

Training needs and corresponding initiatives are analyzed and addressed within the respective brands. The People Letter of Commitment, which is mentioned above, describes the minimum requirements for professional development and further education. The individual requirements for professional development and further education are defined in annual development conversations between employees and their manager and then put into practice with targeted measures during the following year. Individual

development targets and possibilities as well as specific measures and goals are also discussed. These development conversations took place at all brands in 2022 and were even held several times over the year at some subsidiaries.

Employee Health

For the Nemetschek Group, it is of the utmost importance that employees are offered a healthy and safe work environment. This includes minimizing the risk of occupational accidents and work-related illnesses. The company continuously adapts the health-related measures and initiatives to the changing requirements of the working environment. Having a rapid, direct response to changing conditions is enormously important, especially in times shaped by the Covid-19 pandemic which challenged all businesses. Transparent and clear communication as well as a rapid response to fresh changes were also important for the protection of our employees during the pandemic in 2022, including in particularly impacted regions where employees had to be protected with mitigation measures.

In its "People Letter of Commitment", the Nemetschek Group defined minimum requirements for Group-wide workplace health initiatives for all brands. The implementation of the measures will continue to be managed in a decentralized manner. One aim of our health management is to give our employees the opportunity to participate in and promote health-related measures offered by the company. In the reporting year, 12 of the 13 brands (previous year: 9) offered to their employees health-related measures, such as preventive medical checkups and subsidies for fitness studios, particularly for prevention.

Diversity and Inclusion,

Diversity is part of the corporate culture at the Nemetschek Group. The different cultures and distinct individuality are important drivers for the Group's innovation and should therefore be promoted in a targeted manner. The Diversity, Equity, Inclusion and Belonging (DEIB) working group devised guiding principles for the Group during the 2021 fiscal year and agreed it with the CFOO. This statement can be found on the Nemetschek Group website and has also been communicated via internal channels:

"We, the Nemetschek Group, are a global organization with employees from 60 nations. For us, diversity, equity, inclusion, and belonging are the keys to unleashing our full potential and driving true innovation.

We can provide our clients the best support for influencing the world by having a diverse culture. We aim to treat EVERYONE with respect and appreciation, regardless of their differences. Valuing diverse opinions and creating equal opportunities for all are of the utmost importance for us as an organization, and as individuals."

The Supervisory Board decided to issue new targets in the 2021 fiscal year for the share of women on the Supervisory and Executive Boards. A 25% share of women was set for the Supervisory

Board and this target is intended to be reached by December 31, 2025. The share of women on the Supervisory Board was 33.3% on December 31, 2022 (December 31, 2021: 0%).

The Supervisory Board set a target 0% share of women for the Executive Board, which was intended to be reached by December 31, 2022. In setting a target for a period of only one year, the Supervisory Board wished to give the newly elected Supervisory Board in 2022 the possibility of freely deciding about a new share of women. As of December 31, 2022, the proportion of women on the Executive Board was 0% (December 31, 2021: 0%). As of January 1, 2023, the Supervisory Board appointed a female CFO to the four-member Executive Board. In fiscal year 2023, the Supervisory Board set a new target of 25% for the proportion of women on the Executive Board, to be achieved by December 31, 2025.

The Executive Board set a target during the 2021 fiscal year of a 28.6% share of women in the management tier directly beneath the Executive Board. This target is planned to be reached by December 31, 2025. The share of women was 28.6% on December 31, 2022 (December 31, 2021: 28.6%).

Management Approach – Customers and Society

Every company bears social responsibility that extends beyond the mere purpose of its operating activities. Focusing purely on key financials can increase risk in the long term. We learned a lot from our response to the Covid-19 pandemic, amongst other things how important the importance of personal communication and contact with our customers is. Options for digital dialog had already been rolled out or expanded during the pandemic in the previous year and these communication channels remain valuable for day-to-day collaboration today.

To ensure that customers could continue to operate during the Covid-19 pandemic, the brands had already broadened their offering in 2020 and 2021 to include programs such as complimentary online training, free licenses, and other free-of-charge services.

Besides the various day-to-day challenges, the Nemetschek Group as a business partner attaches particular importance to long-term client relationships and deep cooperation in the higher-education sector. With this in mind, common goals and thematic focus points are coordinated at the level of Nemetschek SE. The individual brands take care of the implementation directly as they can act in a more targeted and flexible way locally.

Customer Relationships

Satisfaction is an important factor for long-term customer relationships, which is why 12 of the 13 brands analyze information that provides insight into customer satisfaction. One overriding objective is to have a high level of transparency across all brands with regard to customer wishes and satisfaction and to continuously incorporate the findings into our go-to-market approach. At 9 (previous year: 6) of the brands, systematic targets are already

being set in this area. To be able to address specific customer needs in a targeted manner, the topic is currently managed on a decentralized basis. Most brands use defined key performance indicators to measure customer satisfaction. These include, for example, the „churn rate,“ the „Net Promoter Score,“ and the „Customer Satisfaction Score“ metric. For this purpose, the brands regularly conduct customer surveys, the results of which we incorporate into our go-to-market approach.

To achieve high client satisfaction right from the start, 12 of the 13 brands (previous year: 11) in the Nemetschek Group involve their clients in product development at an early stage. Measures designed to contribute to product quality and client satisfaction during the reporting period included joint development projects, client panels, user groups, and communities as well as product previews, beta testing, and workshops.

Consideration is being made about also carrying out client surveys at a Group level in the future due to the strong revenue growth in recent years and our efforts to further increase the benefits for clients from integration between the individual brands. Doing this should provide findings that further improve collaboration with clients.

Partnerships with colleges of technology and universities

The Nemetschek Group has its roots in university contexts. Beyond that, the Nemetschek Group is also a pioneer of digitization in the construction industry. With this in mind, cooperation with educational institutions is particularly important to the Group. It aims to provide support with software solutions to all relevant institutions offering architecture and construction education in its core markets, such as Europe – focusing on German-speaking markets – and the US. In this context, talented young people are approached in a targeted manner at an early stage in order to plan, construct, and manage buildings and infrastructure projects sustainably. Almost all brands engage in networking activities for students and clients, e.g., through specially provided job platforms, various training formats, guest lectures, job fairs at universities, and cooperation with student associations and academic faculties.

Environment and Climate

Sustainable business and healthy ecosystems are the basis of healthy living. The construction industry is one of the most resource-intensive sectors of the economy. The demand for housing is also continuously increasing. As a result, the construction industry is facing the challenge of using raw materials and energy more efficiently in order to plan, build, and manage buildings more sustainably.

As a partner of and provider of solutions to the AEC/O industry, the Nemetschek Group has a major responsibility toward the environment. Our greatest display of commitment to the environment is our offering of software solutions that improve efficient resource usage in the construction industry, help to use materials

more conservatively, and contribute to reducing the energy needed by buildings.

In addition, the low use of energy and the saving of emissions within the framework of our own value creation play an important role for the Nemetschek Group. We are currently working intensively on obtaining a precise overview of our own operational emissions in order to be able to set our own reduction targets based on this and thus make the Nemetschek Group even more environmentally friendly. In 2022, the Nemetschek Group recorded Scope 1 and Scope 2 emissions across the group for the first time for the reporting year and the year 2021. This data serves as the basis for setting a target, which is to take place in the fiscal year 2023. As part of the Sustainability Report for fiscal 2022, comprehensive reporting on this is provided in the [« Sustainability Report 2022 »](#). In the present non-financial Group statement, the Nemetschek Group focuses on the reporting of the significant topics which are reportable according to CSR-RUG.

Management Approach

Environmental protection is enshrined in the Nemetschek Group's Code of Conduct. With this central document, all employees are urged to conserve natural resources during their activities and to consider environmental as well as economic aspects when selecting suppliers, advertising materials, and other external services.

An important objective of the Nemetschek Group is to help the construction industry to plan, build, and manage more efficiently and thus to do business in a way that consumes less resources overall and improves sustainability. To this end, the management of the relevant aspects, such as research and development, is the responsibility of the individual brands. The market, our clients' requirements, and our competitors' range of products and services were studied as part of an extensive status quo analysis during the reporting period.

The Nemetschek Group published its new Group Environmental Guideline during the 2021 reporting period. It defines core obligations, including among other things requirements to adhere to all relevant laws and internal policies, integrate environmentally relevant processes into day-to-day operations, and encourage all employees to take responsibility for environmental protection and practice that actively in their workplace. Transparency and open communication with all stakeholders on environmentally relevant topics, for example, are just as much a part of this as a sense of responsibility in the selection of suppliers and the purchasing of products, materials and services. The guideline was drawn up by the sustainability department in consultation with the brands and relevant departments within the company and was agreed and approved by the entire Management Board. This Group Environmental Guideline was reviewed again in the reporting year.

Environmental and Social Effects of Products

According to the Global Alliance for Building and Construction's Global Status Report 2022, in 2021, buildings were responsible

for 37% of energy-related CO₂ emissions. To achieve net zero emissions by 2050, emissions would have to fall by more than 98% compared to 2020 levels, according to the report. The environmental and social effects of the Nemetschek Group's solutions mainly relate to two areas: the specified benefits during the life cycle of a building and the incorporation of sustainability-related considerations into software development. For the latter area, the BIM (building information modeling) digital working method and open standards known as OPEN BIM form the basis of software development. BIM enables buildings to be planned and built more precisely and efficiently, reducing errors and the need for reconstruction.

The benefits during the life cycle of a building can be achieved using products and solutions offered in the three segments Design, Build, and Manage.

Design Segment

Using the software developed by the Nemetschek Group, users can plan with greater foresight and precision and avoid reconstruction. What's more, buildings are optimized from as early as the planning stage. For example, using Vectorworks' solutions, the position of the sun and its angle of incidence can be simulated with digital solutions, making it possible to plan windows optimally. In addition, the improved planning offered by Allplan-brand software optimizes steel connections and reduces the consumption of connecting materials by 25%. Vectorworks' Embodied Carbon Calculator is a software solution that provides an integrated modeling and carbon assessment workflow that allows designers and architects to quickly measure the impact of their material and product choices on their project's carbon footprint. Vectorworks' Energos also allows architects to control their project's energy consumption during the design phase, meaning they can perform an initial energy analysis during the design phase without much extra work. Graphisoft's EcoDesigner STAR enables architects to design energy-efficient buildings by combining 3D models with climate data and operational profiles. This allows the energy performance of buildings to be evaluated under a wide range of conditions.

Build Segment

Solutions from the Build segment enable savings to be made during the construction stage. For example, the Planbar planning tool from Allplan can help minimize material use in production and reduce scrap during the prefabrication of concrete construction. On construction sites, the use of Bluebeam Revu can reduce paper consumption by up to 90%. It is also possible to efficiently calculate the carbon footprint during the construction phase. Allplan Precast offers a plug-in for this purpose as well as solutions in cooperation with Built-Heat.

Manage Segment

Around 80% of the costs of a building are incurred during the utilization phase. A large part of this expenditure is incurred through energy consumption. Spacewell Energy from the subsid-

ary Dexma provides data-driven „energy intelligence“ via a software-as-a-service (SaaS) solution. The solution reports energy consumption analyzes usage patterns as well as inefficiencies and detects anomalies in real time. With Spacewell Energy, organizations can automate energy data management to minimize energy consumption in their facilities. Integrated workplace management systems from Spacewell also enable optimal control of heating, ventilation, and lighting. They can also be used to efficiently plan and utilize existing office space by showing how much space is needed. In this way, resources can also be saved.

Furthermore, seamless virtual documentation enables simple and targeted modifications to the buildings, even years after their construction. At the moment, it is not generally known which materials were used when buildings are converted or demolished decades later. The resulting uncertainty costs time, money, and resources. With the exact recording, documentation, and archiving using Nemetschek Group software products, modernization projects are much simpler to calculate and plan. If the construction materials used are known even before the start of any demolition work, demolition measures can be deployed in a targeted manner to obtain raw materials through recycling.

The Nemetschek Group's Sustainability Report presents further specific product solutions as well as concrete examples of implementation in our clients' projects, see [« Sustainability Report 2022 »](#).

Integrity and Compliance

We firmly believe that corruption and bribery by market participants have negative impacts on the relevant markets and, ultimately, can result in negative developments in society. The Nemetschek Group is fully committed to fair competition and firmly rejects corruption and bribery. This is based on its conviction that long-term business success can be achieved only by acting in a legally compliant and responsible manner, and that these efforts will also have a positive payoff for our stakeholders' satisfaction. An open corporate culture and an established compliance management system (CMS) are key in the fight against corruption and bribery.

Actual or suspected violations of applicable laws, internal regulations, or ethical standards could have negative financial consequences. They could also have a negative impact on the reputation of the Nemetschek Group. Accordingly, the Group's primary objective is to avoid compliance incidents comprehensively and systematically. To this end, the Nemetschek Group takes a preventive, risk-based, and tailored compliance approach and fosters a corporate culture in which all employees are sensitized to the issue and receive appropriate training.

Management Approach

Compliance-related activities, which are based on a Group-wide risk analysis completed in 2022, are closely integrated with risk management and the internal control system. Corporate Legal &

Compliance controls compliance activities across the Group. The focus of these activities is on creating suitable structures and processes as well as on supporting the efficient realization of targeted, risk-based compliance measures (including the implementation of Group policies and processes, awareness-raising and communication initiatives, and training). Corporate Legal & Compliance is also the point of contact for any individual questions that may arise from within the organization. There is a direct reporting line to the Nemetschek Group's Chief Financial and Operations Officer, who will be known as the Chief Financial Officer as of January 1, 2023.

The Corporate Audit department regularly performs internal audits to assess compliance with internal guidelines and legal requirements.

As an international organization, the Nemetschek Group has a corporate responsibility toward society and the environment. The commitment and key objective of the Nemetschek Group in Compliance is to comply with the applicable laws everywhere and at all times, to respect fundamental ethical values, and to act in a sustainable manner. This applies not just to employees, but also to suppliers and business partners.

Our employees are expected to treat each other and third parties fairly and respectfully. To this end, our existing Group-wide Code of Conduct was revised and expanded during the 2021 fiscal year, with the covered topics further refined. The areas addressed include human rights and the environment and climate, for example. The Code of Conduct is available to view at any time, in both German and English, on the intranet and the Group website. It has been publicized throughout the Group and is binding for all employees regardless of their position in the company. The Nemetschek Group is also active outside its own companies and is committed to combating modern slavery and human trafficking in its supply chains. Our statement for the UK Modern Slavery Act, most recently released for the 2022 fiscal year, discloses our initiatives on these topics and is available on the Group's website.

The Nemetschek Group's public image is also shaped by its suppliers and business partners. In order to promote trusting and long-term business relationships, the Nemetschek Group focuses on transparent and lawful execution of all transactions. The Nemetschek Group expects its suppliers and business partners to do the same. The Supplier Code of Conduct, which was rolled out Group-wide for this purpose in 2021, can also be viewed on the Group's website and is mandatory for our suppliers and business partners. The Nemetschek Group employs a risk-based approach for this. It provides for case-by-case integration of the Supplier Code of Conduct based on the potential risk exposure by applying special contractual and communicative measures (e.g., explanations and information by referring to the website and by using targeted, risk-based compliance clauses, etc.). This Code of Conduct requires suppliers and business partners to take corporate responsibility in relation to issues such as human rights, anti-discrimination, and the environment and climate. It

also addresses topics such as ensuring transparent business relationships, fair market behavior, and data and information protection. Furthermore, suppliers and business partners are expected to comply with the principles of the UN Global Compact and the fundamental principles of the International Labour Organization (ILO).

The compliance management system (CMS) forms the basis of the preventive compliance approach. The practical implementation of this system in the subsidiaries is carried out by the local executive bodies and the compliance representatives of the individual brands of the Nemetschek Group and by the Group-wide compliance network. Videoconferences were held in March, July, and October 2022 in this area, and provided the opportunity for participants to discuss and receive training on key compliance issues, in some cases related to current facts. Reports on potential compliance incidents are also prepared four times a year. The results in 2022 were consolidated for the Group and reviewed by Corporate Legal & Compliance before being reported directly to the CFOO of the Nemetschek Group. Ad hoc compliance reports are also prepared as required as part of an applied due diligence process. The Executive Board, Audit Committee, and Supervisory Board are updated about compliance-related issues at least four times per calendar year.

The basis of the preventive compliance approach also includes Group-wide regulations in the form of policies on various topics. For example, a Group policy on the topics of antitrust and anti-corruption law was developed, approved by the Executive Board, and published across the Group during the reporting period. There are also already Group policies on the topics of money laundering and the financing of terrorism, data protection, risk management, and internal control.

Corporate Legal & Compliance regularly develops dedicated compliance guidelines for further specific topics and communicates them Group-wide. An important goal is to provide our employees with up-to-date and comprehensible regulations and information on matters relevant to the company and also to offer appropriate training. In the last reporting period, such guidelines addressed, for example, the handling of potential conflicts of interest, export control and sanctions monitoring (sanction list checks), business partner compliance, local policy implementation, and the usage of tip-off systems. On a day-to-day basis, these policies and guidelines are complemented with additional, current Compliance Communication Papers which are distributed through the compliance network. They provide information about a variety of matters such as anticorruption, antitrust law, combating money laundering and the financing of terrorism, conflicts of interest, export control and sanction monitoring, whistleblowing, dawn raids and search warrants, and data protection.

To keep employees aware of the current compliance rules, regular employee information is required. Training courses and regular, individual refresher courses on compliance topics ensure that the relevant rules are an integral part of everyday working life. Furthermore, every new recruit is trained on compliance-related matters through an e-learning program on compliance and data protection during their onboarding. They are also taught about and made aware of the Nemetschek Group's stance on topics such as antitrust law, data protection, and anticorruption measures.

The Nemetschek Group is aware of its overall responsibility in the way its brands work together. Due to the heterogeneous nature of the individual brands, they are required to take responsibility for individually rolling out Group policies and conducting in-house training on compliance topics. This individual, risk-based compliance approach enables Group guidelines to be adapted to local requirements. Accordingly, there are uniform, binding Group guidelines that are supplemented on an individual basis to create structures and processes that function locally in the relevant organizations.

The Nemetschek Group demands and promotes an open "speak-up" culture. It encourages its employees to report behavior that may violate its Code of Conduct and they can do this by contacting their superiors, the relevant HR manager, or Compliance directly.

Moreover, there is a digital, Group-wide tip-off system that can also be used anonymously if desired. The new digital system was launched across the Group in late 2021 and focuses primarily on the key issues of whistleblower protection, anonymity, and data security. The implementation of this new system marks a significant development and a higher level of professionalism in the area of whistleblowing. In this system, tip-offs can be submitted digitally in German or English to the provider "LegalTegrity" using the whistleblowing tool or via telephone.

No substantial compliance violations were reported during the reporting period or the previous reporting period.

Fair Business Practices and Anti-corruption

The Group-wide Code of Conduct incorporates considerations relating to fair business practices and anti-corruption extensively. For example, the Code of Conduct clearly states that corruption, bribery, and other forms of illegally granting and accepting benefits – including in relation to officials and elected representatives – are not tolerated in the Nemetschek Group. In its Code of Conduct, the Nemetschek Group is also fully committed to competition by fair means and strict compliance with antitrust and export control law. All employees of the Group must act in accordance with the applicable competition laws. In addition, the Code of Conduct defines the rules on the separation of private and Group interests and the handling of company and business secrets.

Anti-discrimination

On the subject of discrimination, the Code of Conduct clearly states:

“The Nemetschek Group does not tolerate any form of discrimination or harassment within the Group, whether based on origin, gender, disability, religion, age, sexual orientation, political views, or trade union activities.”

Any employees who are subjected to or observe any form of discrimination or inappropriate behavior are encouraged to report this through the reporting channels described. All incidents of possible discrimination that were reported or otherwise became known were reviewed accordingly during the reporting period. There were no incidents that would have necessitated steps of a disciplinary or legal nature during the 2022 fiscal year, as was the case the year before.

Human Rights

Section 54 of the UK Modern Slavery Act 2015 requires certain global companies to disclose their efforts to combat modern slavery and human trafficking in their supply chains. The Nemetschek Group has again published a statement for 2022 which is intended to provide transparency about its supply chain. The same applies for the relevant business partners. This statement has been made in relation to the supply chains of the brands active in the UK: ALLPLAN GmbH, Bluebeam Inc., Graphisoft SE, Maxon Computer GmbH, and Vectorworks Inc.

The statement outlines the steps that were taken in 2022 to prevent modern slavery and human trafficking in business and supply chains. The Code of Conduct also lays out clear specifications for the upholding of all human rights and for compliance at business partners so that responsibility is taken consciously when choosing suppliers and business partners right from the initiation stage of a business relationship.

Data Protection and Information Security

The Nemetschek Group is at the vanguard of the digital transformation of the AEC/O industry and covers the entire life cycles of construction and infrastructure projects. The software products are mainly installed in clients' IT systems; the risks in terms of data protection and information security are therefore considered to be limited. Nevertheless, the Nemetschek Group takes responsibility and is committed to handling the data of employees, clients, and partners with care across the Group. These employees, clients, and partners can rely on their data being secure at the Nemetschek Group and being processed in compliance with relevant regulations.

The Group follows a largely decentralized approach for this in accordance with its organizational structure. It allows for central guidelines, monitoring processes, and assistance but primarily allocates responsibility to the companies behind the brands. Maintaining data protection and information security is a task shared by all employees at the Nemetschek Group. To this end, all brands have committed to the Code of Conduct.

Data Protection

A comprehensive, Group-wide set of regulations provides the basis for effective data protection. These regulations comprise the adoption of a comprehensive Group Data Protection Guideline in 2018, as well as further extensive tools which are available in German and English on the Group intranet and are updated as and when required. These regulations must be observed and adhered to by all brands in the Group. Regional obligations and regulations such as the European Union's General Data Protection Regulation (GDPR) must be complied with.

Adherence to the data protection requirements and processes is regularly checked by various parties, including Corporate Audit as part of audits in cooperation with Corporate Legal & Compliance and Corporate IT. Data protection officers – both internal and external – are appointed at the companies where required by law. All employees are encouraged reporting any violations of data protection regulations or internal company policies. Any indication of possible violations of data protection regulations is taken seriously and followed up on as quickly as possible.

In addition, employees receive training and communication measures are carried out. New employees are notified of confidentiality requirements relating to the handling of sensitive and personal data and are required by their contracts to maintain secrecy. Furthermore, all employees – and not just those in Europe – are required to participate in data protection training at regular intervals of at least every two to three years and to provide documented evidence of this training. An e-learning course set up specifically to deal with the issue of data protection is offered across the Group in both German and English.

Information Security

Data security is ensured in the Nemetschek Group by means of appropriate organizational and technical measures at the Group level and at the level of the 13 brands. The overarching security standards and measures are specified and monitored by Corporate Information Security. They are based on an information security management system that meets the recognized information security standards under ISO 27001.

These requirements are described in the Group-wide information security policy, which was newly introduced in 2022. It comprises guidelines for the organization of information security, for the integration of management, and for the necessary technical and organizational measures that serve the implementation and monitoring of information security. The scope of this information security policy, which is binding for all Group units, covers the protection of all IT systems, the data stored in them, and the security of our products. The measures related to this policy were adapted according to ISO 27001 to the current prevailing conditions and needs in 2022 as part of a “plan-do-check-act” cycle.

The outlined measures aim to prevent security incidents, detect them in their root stages, and ensure an appropriate response if they do occur. The measures are also reviewed at regular intervals by independent bodies as well as by Corporate Audit and Information Security.

The measures that are implemented in a decentralized manner by the brands are also complemented by regular information security measures that are controlled centrally by Corporate Information Security. They include, for example, awareness campaigns with phishing simulations and other technical and organizational security projects. Four campaigns were carried out during the reporting period. The Nemetschek Group additionally holds Group-wide cybersecurity insurance covering all companies in the Group for further protection against cyber risk.

2.3 EU Taxonomy

As of fiscal year 2021, companies required to prepare non-financial consolidated financial statements in accordance with Section 315b of the German Commercial Code (HGB) must comply with the requirements of the EU taxonomy, more specifically Regulation (EU) 2020/852 of the European Parliament and of the Council of June 18, 2020, on establishing a framework to facilitate sustainable investment and amending Regulation (EU) 2019/2088. The EU Taxonomy provides a single classification system for the environmental sustainability of economic activities. On the one hand, this is intended to make the sustainability activities of companies more comparable and, on the other, to achieve the implementation of the European Green Deal, i.e., climate neutrality by 2050.

ENVIRONMENTAL GOALS OF THE EU

1. Climate change mitigation	4. Transition to a circular economy
1. Climate change adaptation	5. Pollution prevention and control
3. Sustainable use and protection of water and marine resources	6. Protection and restoration of biodiversity and ecosystems

According to Article 8 of the EU Taxonomy Regulation, for the reporting year 2022, the share of revenues, capital expenditures, and operating expenditures related to taxonomy-eligible and taxonomy-compliant economic activities related to the first two environmental objectives of climate change mitigation and adaptation must be published.

Process for surveying the taxonomy-eligible and taxonomy-compliant activities of the Nemetschek Group

In order to survey the taxonomy-eligible* and taxonomy-compliant activities, a working group consisting of specialists and managers from the areas of finance, controlling, investor relations and the sustainability department was put together in the previous year. In addition, benchmarking was carried out with various market competitors.

To determine the taxonomy eligibility of the revenue, the individual revenue streams were first identified by segment, brand and product. Then, the relevant economic activities were identified based on Annex I and II of the delegated act on the two climate targets. These were first validated at the level of Nemetschek SE and then with the controlling of the operating units. Subsequently, the taxonomy eligibility of the capital and operating expenditures was analyzed. The analysis carried out in the previous year was checked for validity in the fiscal year 2022 and did not provide any new findings. To avoid double counting in the analysis, the allocation was always made to only one relevant economic activity.

The following key figures were determined on the basis of the process described and with reference to the basic figures in connection with the International Financial Reporting Standards (IFRS) applicable to the consolidated financial statements.

In-depth analysis of revenues

The business model of the Nemetschek Group is to develop and sell software for the construction and media industries. Activities 8.2 (Data-based solutions to reduce greenhouse gas emissions) and 9.3 (Freelance services related to the energy performance of buildings) were identified as taxonomy-eligible with regard to the environmental goal of climate protection. The in-depth investigation revealed that these activities are considered immaterial (< 1%) due to the low volume of sales. There are no revenues that potentially have a material contribution to climate change adaptation.

Revenue in accordance with the EU taxonomy comprises the revenue reported in the consolidated statement of comprehensive income. In fiscal year 2022, these amounted to EUR 801.8 million and can be reconciled to our consolidated financial statements [<< Consolidated financial statements \(IFRS\) - Statement of comprehensive income >>](#). In order to determine the taxonomy-eligible or taxonomy-compliant portion of revenue, the revenue assessed as taxonomy-eligible is set in relation to the revenue of the Nemetschek Group.

As the Nemetschek Group does not have any taxonomy-compliant revenues, the following reporting focuses on the proportion of sustainable investments (CapEx) and operating expenses (OpEx) within the meaning of the EU taxonomy that can be allocated to the first environmental objective. There are no capital or operating expenditures that potentially have a significant contribution to cli-

mate change adaptation. Eligible capital and operating expenditures relate exclusively to purchased goods and services.

In-depth examination of capital expenditures (CapEx).

In fiscal 2022, total capital expenditures were determined from additions to property, plant and equipment of EUR 14.0 million ([<< Note 15 Property, plant and equipment >>](#) in the notes to the consolidated financial statements), intangible assets of EUR 33.1 million ([<< Note 16 Intangible assets and goodwill >>](#) in the notes to the consolidated financial statements), and additions to rights of use of EUR 27.4 million ([<< Note 17 Leasing >>](#) in the notes to the consolidated financial statements). In total, the aforementioned investments amounted to EUR 74.5 million in the financial year 2022. To determine the taxonomy-eligible or taxonomy-compliant portion, the investments assessed as taxonomy-eligible or taxonomy-compliant are set in relation to the total investments determined.

The capital expenditure of the Nemetschek Group is of minor importance overall due to the business model. On the basis of the analysis carried out, no significant taxonomy-compliant investments were identified. Thus, the taxonomy-eligible capital expenditures in the fiscal year 2022 were EUR 0 million.

In-depth analysis Operating expenses (OpEx).

Total OpEx consists of direct non-capitalized costs related to research and development, building renovations, short-term leases, maintenance, and repair. These include:

- » Research and development expenses recognized as an expense in the consolidated statement of income in the reporting period. In accordance with the consolidated financial statements (IAS 38.126), this includes all non-capitalized expenses directly attributable to research or development activities.
- » Maintenance and repair costs were determined on the basis of the maintenance and repair costs allocated to internal cost centers. The corresponding cost items can be found in the divisional costs of the income statement.

Based on the analysis performed, no significant taxonomy-eligible operating expenses were identified.

* Taxonomy-eligible means that the economic activities fall within the scope of the EU taxonomy. This does not necessarily mean that these economic activities also make a substantial contribution to the achievement of an environmental objective (taxonomy-compliant).

Summary presentation of the taxonomy-eligible economic activities.

SUMMARY PRESENTATION OF THE TAXONOMY-ELIGIBLE ECONOMIC ACTIVITIES.

	Revenue		CapEx		OpEx	
	In EUR million	in %	In EUR million	in %	In EUR million	in %
Nemetschek Group	801.8	100%	74.5	100%	183.6	100%
Of which taxonomy eligible business activities	0.0	0%	0.0	0%	0.0	0%

The current focus of the EU taxonomy is on carbon-intensive industries. The Nemetschek Group with its core business is therefore currently not affected by the EU taxonomy regulation.

Due to the upcoming expansion with the four further environmental targets, as well as possible expansion of the existing environmental targets with further activities, it cannot be ruled out that the business activities of the Nemetschek Group will be affected by the EU taxonomy regulation in the future.

REPORTING SHEET: PROPORTION OF REVENUES FROM GOODS OR SERVICES RELATED TO TAXONOMY-COMPLIANT ECONOMIC ACTIVITIES - DISCLOSURE FOR THE YEAR 2022

Business activities	Code(s)	Revenues (absolute) (EUR million)	Share (of total revenues) (%)	Criteria for a substantial contribution					
				Climate change mitigation (%)	Climate change adaption (%)	The sustainable use and protection of water and marine resources (%)	The transition to a circular economy (%)	Pollution prevention and control (%)	The protection and restoration of biodiversity and ecosystems (%)
