NEMETSCHEK GROUP

HALF-YEAR STATEMENT AS OF JUNE 30, 2026

New Era of Intelligence

To our shareholders

Dear shareholders,

The Nemetschek Group successfully continued its dynamic growth trajectory in the second quarter of 2026. Following the strong business performance in the first half of the year, the company fully confirms its previous outlook for the organic business (i.e., excluding acquisition effects) for the financial year 2026. In addition, the outlook has been expanded to reflect the consolidation of HCSS as of July 1, 2026.

The first half of 2026 was characterized by continued strong operational performance and important strategic milestones for the Nemetschek Group. With the successful closing of the HCSS acquisition, the largest acquisition in the company's history, the Nemetschek Group strengths its market position in the infrastructure and heavy civil construction sector, which offers very attractive long-term growth prospects. At the same time, Nemetschek consistently continues to execute its AI strategy. The successful market launch of the agentic AI suite, Bluebeam Max, together with the further expansion of Group-wide AI solutions, sets new standards for the integration of AI across the addressed industries. The combination of strong organic growth, strategic investments and a clear AI strategy provide an excellent foundation for sustained profitable growth and long-term value creation for the customers, partners and shareholders of the Nemetschek Group.

Key Group Financial Highlights for Q2 and the First Half of 2026

- **Group revenue** continued its strong growth in Q2, increasing by 14.5% at constant currency to EUR 327.7 million compared to the same period last year. Reported revenue growth, including negative foreign currency effects, was at 13.0%. In the first half of 2026, Group revenue increased to EUR 640.7 million, representing a constant-currency growth of 15.7% (reported: +11.9%). The Build segment once again was the main growth driver.
- **Annual Recurring Revenue (ARR)** increased by 17.4% at constant currency (reported: +15.9%) to EUR 1,249.5 million in Q2, outpacing Group revenue growth. The main driver were revenues from **subscription and SaaS models**, which increased by 29.6% at constant currency (reported: +27.8%) to EUR 266.4 million. For the first six months of 2026, subscription and SaaS revenue increased by 32.4% at constant currency to EUR 514.7 million (reported: +27.5%).
- **Consolidated operating earnings before interest, taxes, depreciation, and amortization (EBITDA)** increased by 15.8% at constant currency to EUR 98.6 million in Q2 (reported: +11.5%). In addition to the slightly negative translation currency effect stemming mainly from the weaker USD, the EBITDA was also impacted in the second quarter by an extraordinary transactional currency effect. This effect in the higher-single-digit million-euro range resulted from the revaluation of assets & liabilities held in non-functional currency of an individual Group company as of the reporting date, due to significant and unexpected exchange rate fluctuations during the second quarter of the year. The EBITDA margin in Q2, including this effect, reached 30.1%. Additionally, the EBITDA margin in Q2 includes acquisition-related one-off costs of a low single-digit million-euro amount. Adjusted for the one-off acquisition-related costs, the EBITDA margin in Q2 amounted to 31.0%. For the first half of 2026, EBITDA increased by 24.0% at constant currency (reported: 16.5%) to EUR 197.0 million, corresponding to an EBITDA margin of 30.7% (same period last year: 29.5%). Adjusted for the one-off acquisition-related costs the EBITDA margin in H1 was 31.5%.
- **Net income for the quarter** increased significantly by 25.4% to EUR 66.0 million, corresponding to earnings per share (EPS) of EUR 0.57 (Q2 2025: EUR 0.45). For the first half of the year, net income increased by 29.9% to EUR 126.4 million; earnings per share were at EUR 1.09 (prior year: EUR 0.84).

Strategic Highlights

In the first half of 2026, the Nemetschek Group achieved key strategic milestones to consistently advance its growth strategy.

- With the acquisition of **Heavy Construction Systems Specialists, LLC (HCSS)**, headquartered in Sugar Land, Texas, the Nemetschek Group completed the largest acquisition in the Company's history. The transaction, which was announced in mid-April 2026, was legally completed (closed) on July 1, 2026. Through this acquisition, the Nemetschek Group further strengthens its presence in the attractive infrastructure and heavy civil construction market within its Build segment. HCSS ideally complements the Group's existing solution portfolio and opens up additional growth opportunities in this structurally attractive, highly growing market.

Yves Padrines
Chief Executive Officer (CEO)

- The launch of **Bluebeam Max**, the Nemetschek Group's first comprehensive agentic AI solution for the construction industry, marked a major milestone in the execution of its **AI strategy**. Bluebeam Max supports users with time-consuming tasks such as quality control during the pre-construction phase, document analysis, quantity takeoff, and intelligent information search, thereby increasing productivity and efficiency throughout key construction workflows. In addition, the Nemetschek Group introduced further AI capabilities across several of its brands, further advancing the integration of AI into its software portfolio.
- At the same time, the Nemetschek Group has further expanded its **international presence** and continued to strengthen its Group-wide **go-to-market approach**. Following its expansion into growth regions such as India and Middle East, the Nemetschek Group has strengthened its regional footprint in South East Asia, while further enhancing collaboration with international AEC/O customers and Group wide strategic account management across all brands to unlock additional cross selling opportunities.

Segment Performance in the Second Quarter and First Half of 2026

- The **Design segment** recorded constant-currency revenue growth of 9.9% in the second quarter, reaching EUR 142.9 million (reported: +8.9%). The transition of the business model to subscription and SaaS continued successfully and according to plan, as reflected in the strong growth of this revenue category of 46.7% at constant currency (reported: +45.5%). Additionally, the Nemetschek Group continued to offer multi year contracts to support the migration of existing customers from service contracts to subscription models. For the first half of 2026, constant-currency revenue growth amounted to 9.7% (reported: +7.3%).

  The reported EBITDA margin for the second quarter was 22.7% (Q2 2025: 30.5%), reflecting the extraordinary impact from the above-mentioned negative foreign exchange effect in the higher-single-digit million euro range from the revaluation of assets & liabilities held in non-functional currency. For the first half of 2026, the reported EBITDA margin was 23.9% (prior-year period: 27.2%).
- The **Build segment** continued to demonstrate very strong growth, driven in particular by sustained strong new business momentum and successful international expansion. In addition, Bluebeam successfully completed the rollout of its agentic AI suite Bluebeam Max. The solution is now available through all relevant sales and partner channels and for all customer segments, underscoring the Nemetschek Group's leadership in innovation in the field of AI-powered software solutions for the construction industry. Segment revenue increased by 24.5% at constant currency (reported: +22.4%) to EUR 142.9 million in Q2. Revenue for the first half of the year increased to EUR 277.7 million, representing constant currency growth of 27.1% (reported: 21.1%). The EBITDA margin reached a high 40.1% in the second quarter (Q2 2025: 34.1%) and 39.8% for the first half of the year (prior-year period: 34.6%).

» In the **Manage segment**, revenue in Q2 increased to EUR 13.1 million, representing a growth of 4.6% both at constant currency and on a reported base. Continued good demand and a well-stocked sales pipeline across both existing and new customers – particularly in the public and financial sectors – provide a solid foundation for stronger growth in the second half of the year. During the second quarter, growth accelerated particularly for software solutions in the areas of Workspace Management and Energy Efficiency. For the first half of 2026, the segment achieved constant-currency revenue growth of 3.8%. The EBITDA margin amounted to 5.1% in the second quarter (Q2 2025: 7.6%) and 7.8% for the first half of the year (H1 2025: 9.3%).

» In the **Media segment**, revenue remained nearly at the prior-year level at EUR 29.4 million (prior year: EUR 30.1 million). For the first half of 2026, revenue increased by 3.3% at constant currency (reported: –0.7%). Business performance in the second quarter remained below expectations due to the continued challenging market environment. This was primarily driven by customers‘ ongoing cautious investments, lower spendings for content creation, customer consolidation, as well as extended decision-making and sales cycles. To further diversify the segment, the Nemetschek Group continued to broaden its portfolio. Key initiatives included the launch of the Archviz rendering solution, strengthening the Group‘s position in the AEC/O industry. The EBITDA margin increased to 27.7% in the second quarter (Q2 2025: 25.2%). For the first half of 2026, the EBITDA margin improved to 29.8% (H1 2025: 28.1%).

Outlook for Full Year 2026

Following a successful first half-year, the Executive Board fully confirms its previous targets for organic business, excluding the acquisition of HCSS. The Executive Board continues to expect currency-adjusted organic revenue growth in the range of 14% to 15% for financial year 2026, as well as an EBITDA margin between 32% and 33%. Excluding acquisition-related one-off costs, the EBITDA margin would have been at the upper end of the guidance range.

Following the first-time consolidation of HCSS as of July 1, 2026, the Executive Board estimates an additional, currency adjusted contribution to Group revenue growth of around 600 basis points (including the PPA effect) in the financial year 2026. Including acquisition-related one-off costs and therefore starting from the mid-point of the reported EBITDA margin guidance of 32% to 33%, a dilution of around 150 basis points is expected following the HCSS acquisition. This mainly reflects the expected impact of the purchase price allocation (PPA) for HCSS, as well as ongoing integration expenses and recurring expenses related to a newly established share-based compensation program, designed to support and drive value creation in the expanded Build segment over the coming years.

The contribution of the HCSS acquisition in terms of revenue and EBITDA does not yet reflect the full potential. The statements regarding the expected impact of the HCSS acquisition on the 2026 financial year are subject to the finalization of the PPA for HCSS, which is expected later this year. The PPA will be recognized over a period of twelve months and is expected to be front-end loaded, with the majority being recognized during the first six months. Based on preliminary estimates, it is expected to reduce the revenue of HCSS by a mid- to high-twenties million-euro amount in the second half of 2026, with a corresponding impact on EBITDA.

These forecasts are based on the assumption that global economic and industry-specific conditions will not deteriorate during the current fiscal year. Furthermore, it is assumed that the current conflict in the Middle East will neither escalate significantly nor persist over an extended period.

Yours sincerely

Yves Padrines

Nemetschek on the Capital Market

Global Stock Market Performance in the First Half of 2026

In the first half of 2026, global stock markets remained robust overall despite a challenging geopolitical and macroeconomic environment. The renewed escalation of geopolitical tensions in the Middle East and the resulting increases in energy and commodity prices had a particularly negative impact. As a result, inflation expectations rose noticeably again over the course of the first half of the year, causing further monetary easing by major central banks to recede into the background. At the same time, robust corporate earnings and continued investment in digitalization, artificial intelligence, and infrastructure ensured an overall stable market sentiment.

In light of heightened inflation risks, the European Central Bank (ECB) and the U.S. Federal Reserve (Fed) maintained their cautious monetary policy stance. Capital market expectations regarding further interest rate cuts were significantly scaled back over the course of the first half of the year. Despite the continued challenging interest rate environment and persistent geopolitical uncertainties, international stock markets performed positively overall.

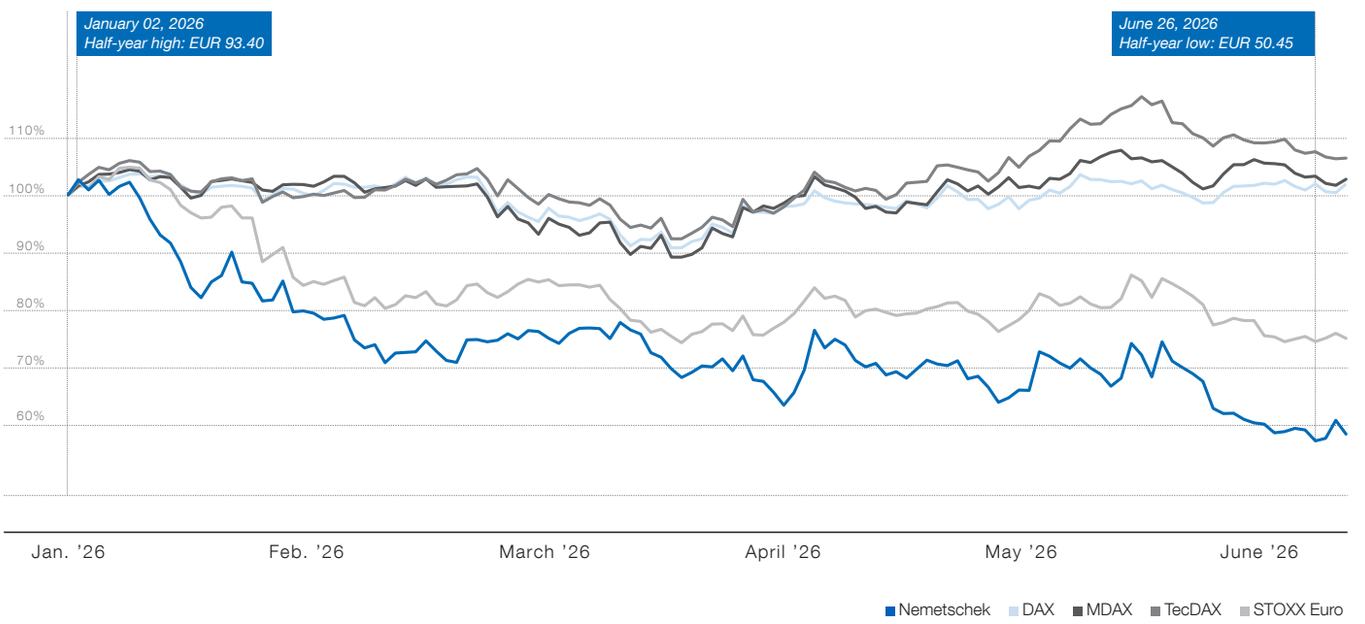
So far in 2026, the German benchmark index, the **DAX**, has once again posted a slight gain (+1.9%) despite the challenging market environment. This performance was driven, among other factors, by robust corporate earnings and ongoing investments in digitalization, infrastructure, and artificial intelligence.

The **MDAX** also performed positively overall (+2.7%), although its performance continued to be shaped by mixed trends across individual sectors.

International stock markets also showed a predominantly positive trend in the first half of 2026, despite intermittent volatility. At the European level, the EURO STOXX 600 (+7.6%) benefited from generally stable economic conditions. In the U.S., the S&P 500 (+12.2%) and, in particular, the Nasdaq Composite (+15.8%) also performed well, driven primarily by companies in the artificial intelligence, semiconductor, and cloud infrastructure sectors.

At the same time, the revaluation of the technology and software sectors—which had begun in the second half of 2025 and was, in part, undifferentiated—continued into the first half of 2026. Against the backdrop of rapid advances in the field of artificial intelligence, investors frequently questioned established software business models across the board, without sufficiently distinguishing between the individual opportunities, risks, and competitive positions of each company. This trend was also reflected in the performance of the STOXX Europe Total Market Software & Computer Services index, which declined by 25.6% in the first half of 2026. At the same time, hardware and infrastructure companies—perceived as direct beneficiaries of the AI investment cycle—continued to be valued significantly more positively.

DEVELOPMENT OF THE NEMETSCHEK SHARE IN 2026 COMPARED TO THE DAX, MDAX, TECDAX AND STOXX (SOFTWARE & COMPUTER SERVICES) INDEXED



Nemetschek Share Price Development since the Beginning of 2026

The Nemetschek share was not immune to the trends described in the technology and software sector during the first half of 2026. Following record highs in the first half of 2025, the stock recorded a price decline of 41.2% in the first half of 2026. At the end of the first half of the year on June 30, 2026, Nemetschek SE shares closed at EUR 53.10, corresponding to a market capitalization of approximately EUR 6.2 billion. By the end of July, Nemetschek SE shares had stabilized at this level.

Regardless of the share price performance, the Nemetschek Group's operating business continued to perform very successfully in the first half of 2026. The company achieved significant strategic milestones, particularly through the successful acquisition of HCSS, the consistent implementation of its group-wide AI strategy, the ongoing transformation to subscription and SaaS models as planned, and the continued very strong operating performance. However, against the backdrop of the sector-wide revaluation described above, this development was not reflected in the share price performance of Nemetschek SE during the first half of 2026.

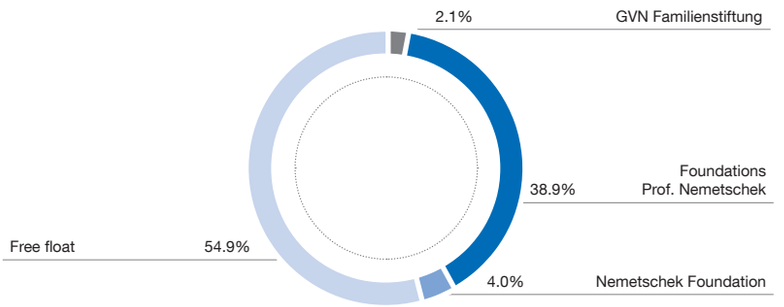
Shareholder Structure

As of June 30, 2026, Nemetschek SE's share capital amounted to EUR 115,500,000 and was divided into 115,500,000 no-par bearer shares. As of June 30, 2026, the company held 9,206 treasury shares. The company has no voting rights attached to these treasury shares.

The free float stood at 54.9% as of June 30, 2026. The shareholder base was broadly diversified regionally—with a high proportion of international institutional investors, particularly from the U.S. and Europe.

The Nemetschek family, with its direct and indirect shareholdings, remained the largest shareholder and anchor shareholder of Nemetschek SE in the first half of 2026.

SHAREHOLDER STRUCTURE*



* Direct shareholdings as of July 2, 2026.

Successful Annual General Meeting: Approval of all Agenda Items

This year's Annual General Meeting took place on **May 21, 2026,** as an in-person event in Munich. During the meeting, shareholders were briefed on the results of the 2025 fiscal year and the outlook for the current 2026 fiscal year. The agenda was also presented. In the subsequent vote, the company's shareholders approved all agenda items.

An important agenda item was the dividend distribution. For the 2025 fiscal year, the Executive Board and Supervisory Board proposed a dividend of **0.68 EUR per share,** representing a **24%** increase over the previous year (**0.55 EUR per share**). The total dividend payout thus amounted to **EUR 78.5 million** (previous year: **EUR 63.5 million**). The company thus continued its sustainable dividend policy based on its successful business performance in 2025 and increased the dividend for **the thirteenth consecutive time.** The attractive dividend policy was consistently maintained, while the company continued to invest in strategic growth initiatives, innovations in the field of artificial intelligence, and value-enhancing corporate acquisitions to sustainably promote future growth.

Furthermore, the meeting approved the discharge of the members of the Executive Board and the Supervisory Board for fiscal year 2025, as well as the appointment of the auditor and the auditor of the consolidated financial statements for fiscal year 2026 and the auditor of the sustainability report for fiscal year 2026. Other items on the agenda included, among others, the approval of the compensation report for fiscal year 2025, as well as the approval of the Executive Board compensation system and the confirmation of the Supervisory Board compensation system.

Interim Group Management Report (Q2 2026)

Report on the earnings, financial and asset situation

Results of Operations

Successful first half of 2026: Strong revenue growth of 11.9% with an EBITDA margin of 30.7%

In the first six months, Group revenues increased by 11.9% to EUR 640.7 million (previous year: EUR 572.8 million). Adjusted for currency effects, i. e. on the basis of constant exchange rates, revenue growth would have amounted to 15.7%. This development was primarily driven by the continued exceptionally strong growth in the Build segment. The Design segment also delivered a good operational performance.

EBITDA increased by 16.5% to EUR 197.0 million (previous year: EUR 169.1 million), outpacing revenue growth. The EBITDA margin increased from 29.5% in the first six months of 2025 to 30.7% as of June 30, 2026. In addition to a slightly negative translation currency effect stemming mainly from the weaker USD, the EBITDA was also impacted in the second quarter by an extraordinary transactional currency effect. This effect in the higher-single-digit million-euro range resulted from the revaluation of assets & liabilities held in non-functional currency of an individual Group company as of the reporting date, due to significant and unexpected exchange rate fluctuations during the second quarter of the year. Additionally, the EBITDA margin includes acquisition-related one-off costs.

Revenue development

Revenues by business type – Subscription and SaaS remain growth driver

All in all, the first six months of 2026 saw very strong development in revenue. Simultaneously, the Group made further progress toward its strategic objective of increasing the share of recurring revenues – especially subscription and SaaS – in total revenues. In total, recurring revenues increased to EUR 609.2 million (same period of previous year: EUR 529.2 million), corresponding to a growth of 15.1% (currency-adjusted: 19.2%). Subscription and SaaS revenues alone increased significantly by a 27.5% (currency-adjusted: 32.4%), from EUR 403.6 million in the same period of the previous year to EUR 514.7 million. The ARR increased by 15.9% in the first six months of 2026 (adjusted for currency effects: 17.4%) to EUR 1,249.5 million, which was significantly stronger than total revenue growth. As a result, the share of recurring revenues improved by 2.7 percentage points from 92.4% to 95.1%.

Consequently, revenues from software licenses amounted to EUR 13.2 million in the first six months of the financial year, a decline of –49.3% compared to the same period of the previous year (EUR 26.1 million). Adjusted for currency effects, the decrease amounted to –46.6%. Thus, the share of total revenues attributable to revenues from software licenses declined significantly from 4.6% in the previous year to now 2.1%.

Revenues by region – Internationalization

A key diversification factor is the Group's increasing global orientation. In the first six months of 2026, domestic revenues increased by 14.3% to EUR 106.1 million (same period of previous year: EUR 92.9 million). In its foreign markets, the Nemetschek Group generated revenues of EUR 534.6 million (same period of previous year: EUR 479.9 million), corresponding to an increase of 11.4% compared to the previous year period. The reported revenue growth abroad was impacted by negative currency effects, primarily due to the weaker US dollar. Foreign markets accounted for 83.4% of total revenues in the first six months of 2026 (same period of previous year: 83.8%).

Overview of segments

The **Design segment**, whose business activities are mainly focused on Europe, generated revenues of EUR 279.1 million in the first six months of 2026 (same period of previous year: EUR 260.1 million). This corresponds to a growth of 7.3% (currency-adjusted: 9.7%). The transition of the business model to subscription and SaaS continued successfully and according to plan, reflected in the strong growth of this revenue category of 50.4% (constant-currency) and 47.2% (reported). The Nemetschek Group continued to offer multi-year contracts to support the migration of existing maintenance customers to subscription models.

EBITDA decreased by –5.5%, from EUR 70.8 million in the first six months of 2025 to EUR 66.8 million in the first six months of 2026. This led to a margin of 23.9% (same period of previous year: 27.2%), reflecting the extraordinary impact from the above-mentioned negative foreign exchange effect.

In the **Build segment**, which primarily targets construction companies in the US and the German-speaking countries, the exceptionally strong growth continued, predominantly driven by strong growth momentum in new units and further successful international expansion. In total, the segment's revenue grew significantly by 21.1% in the first six months of 2026 (currency-adjusted: 27.1%) to EUR 277.7 million (same period of previous year: EUR 229.2 million). In addition, Bluebeam successfully completed the rollout of its agentic AI suite Bluebeam Max. The solution is now available through all relevant sales and partner channels

and for all customer segments, underscoring the Nemetschek Group's leadership in innovation in the field of AI-powered software solutions for the construction industry.

The EBITDA increased significantly and over-proportionally to revenue, by 39.3% to EUR 110.5 million in the first six months of 2026 (same period of previous year: EUR 79.3 million). At 39.8%, the EBITDA margin in the first six months of 2026 was above the previous year's level of 34.6%.

The **Manage segment** focuses mainly on the European commercial construction market. Revenues totaled to EUR 26.3 million in the first six months of 2026. This represents a growth of 3.9% (currency-adjusted: 3.8%) compared to the same period of the previous year, when revenues amounted to EUR 25.3 million. Continued good demand and a well-stocked sales pipeline across both existing and new customers – particularly in the public and financial sectors – provide a solid foundation for stronger growth in the second half of the year.

Segment EBITDA amounted to EUR 2.0 million in the first six-months of 2026 (same period of previous year: EUR 2.3 million), with the result that the margin reached 7.8% in the first six months of 2026 (same period of previous year: 9.3%).

In the **Media segment** revenues amounted to EUR 59.0 million, which is reflected in a slight decrease of –0.7% (currency-adjusted: 3.3%) compared to the same period of the previous year (EUR 59.5 million). Business performance in the second quarter remained below expectations due to the continued challenging market environment. This was primarily driven by customers' ongoing cautious investments, lower spendings for content creation, customer consolidation, as well as extended decision-making and sales cycles. To further diversify the segment, the Nemetschek Group continued to broaden its portfolio. Key initiatives included the launch of the Archviz rendering solution, strengthening the Group's position in the AEC/O industry.

EBITDA increased to EUR 17.6 million in the first six months of 2026 (same period of previous year: EUR 16.7 million). Accordingly, the EBITDA margin increased from 28.1% in the first six-months of 2025 to 29.8% in the first six months of 2026.

Earnings performance – Earnings per share at EUR 1.09

Operating expenses increased by 10.3% in the first six months of 2026 from EUR 447.9 million to EUR 494.0 million. The cost of materials included in this item increased to EUR 23.7 million (same period of previous year: EUR 22.1 million). Personnel expenses rose by 7.1% from EUR 235.1 million in the first six months of 2025 to EUR 251.8 million. Other expenses increased by 16.5% from EUR 154.3 million to EUR 179.7 million. Depreciation and amortization of fixed assets increased by 6.6% from EUR 36.4 million to EUR 38.8 million. Net Finance Cost improved significantly from EUR -7.6 million in the prior year to EUR 6.0 million, primarily due to the positive fair value of the EUR/USD forward transaction concluded in connection with the HCSS acquisition and foreign currency gains.

In the first six months of 2026 the net income (group shares) increased by 29.9% to EUR 126.4 million (same period of previous year EUR 97.3 million). The corresponding earnings per share amounted to EUR 1.09 (same period of previous year: EUR 0.84). Adjusted for amortization from the purchase price allocation after tax, net income increased by 28.4% to EUR 144.9 million (same period of previous year: EUR 112.9 million), resulting in earnings per share of EUR 1.25 (same period of previous year: EUR 0.98).

The Group's tax rate amounted to 21.8% in the first six months of 2026 (same period of previous year: 20.9%).

Financial position

Development of cash flow – Operating cash flow at EUR 175.4 million – Cash and cash equivalents at EUR 392.1 million

Cash flow from operating activities was primarily used for dividend payments, acquisitions, repayments of the revolving credit facility, investments in start-ups and associates, repayments of lease liabilities, investments in fixed assets and intangible assets.

The Nemetschek Group generated a **cash flow from operating activities** of EUR 175.4 million in the first six months of 2026 (same period of previous year: EUR 199.8 million).

Cash flow from investing activities amounted to EUR –95.6 million in the first six months of 2026 (same period of previous year: EUR –14.5 million) and includes payments for acquisitions of EUR 73.2 million (same period of previous year: EUR 3.8 million), payments for investments in associates of EUR 12.0 million (same period of previous year: EUR 0.6 million), payments for investments in start-ups in the amount of EUR 3.3 million (same period of previous year: EUR 3.9 million) as well as capital expenditures of EUR 7.5 million (same period of previous year: EUR 6.2 million).

The **cash flow from financing activities** amounted to EUR 51.9 million (same period of previous year: EUR –144.4 million) and mainly includes drawdowns from the revolving credit facility of EUR 205.3 million (same period previous year: EUR 81.6 million), repayments of the revolving credit facility of EUR 60.0 million (same period of previous year: EUR 131.0 million), the repayments of lease liabilities of EUR 7.8 million (previous year: EUR 8.4 million), dividend payments of EUR 78.5 million (previous year: EUR 63.5 million) and interest payments of EUR 5.3 million (previous year: EUR 10.4 million) relating to the promissory note loan and the revolving credit facility.

As a result of rounding, it is possible that the individual figures in this quarterly report do not exactly add up to the totals shown and that the percentage disclosures do not reflect the absolute values to which they relate.

As at June 30, 2026, the Nemetschek Group held cash and cash equivalents of EUR 392.1 million (December 31, 2025: EUR 252.0 million).

Asset situation

Equity ratio at 43.7%

The balance sheet total increased from EUR 2,118.2 million to EUR 2,418.6 million compared to December 31, 2025. Equity amounted to EUR 1,056.9 million (December 31, 2025: EUR 965.5 million). The net income for the first six months (EUR 128.1 million), the foreign-currency-related increase of the Group‘s net assets (EUR 37.5 million), and the share-based compensation (EUR 5.6 million) had an equity-increasing effect; these effects were partially offset by dividend payments (EUR -78.5 million). The dividend for the 2025 financial year increased by 23.7%, from EUR 0.55 per share in 2024 to EUR 0.68 per share.

The equity ratio reached 43.7% as of June 30, 2026 compared to 45.6% as of December 31, 2025.

Significant events after the interim reporting period

On July 1, 2026, the Nemetschek Group completed the acquisition of Heavy Construction Systems Specialists, LLC (“HCSS”), headquartered in Sugar Land, Texas (USA). HCSS, Inc. is a provider of software solutions for the infrastructure and heavy civil construction sector in North America. HCSS employs over 550 employees. The integrated software platform offered by HCSS supports the planning, management, and execution of infrastructure and heavy civil construction projects and contributes to improvements in operational efficiency, safety, and project communication. The transaction complements the Build segment.

As part of the transaction, Thoma Bravo acquired a minority interest in the Build segment and now holds approximately 28% of the shares, while the Nemetschek Group continues to hold approximately 72%. In addition, the Nemetschek Group refinanced all existing financial liabilities of HCSS. As a result, the Group’s net debt increased by approximately EUR 450 million.

The impact of the acquisition on the Nemetschek Group’s earnings, financial position, and net assets for fiscal year 2026 is reflected in the report’s forecasts and other statements regarding the expected development. HCSS will be fully consolidated from July 1, 2026. Further disclosures prusuant to IFRS 3.B64 were not yet available at the time the interim report was prepared.

There were no other significant events after the end fo the interim reporting period.

Employees

The Nemetschek Group had 4,268 employees as of June 30, 2026 (June 30, 2025: 4,041), representing an increase of 5.6% compared to the prior-year period. In the following quarters, the Nemetschek Group intends to further moderately increase its workforce in order to ensure future growth.

Report on opportunities and risks

Please refer to the opportunities and risks described in the Group management report as of December 31, 2025 for the significant opportunities and risks of the Nemetschek Group’s expected development.

Report on forecasts and other statements on expected development

Following a successful first half-year, the Executive Board fully confirms its previous targets for organic business, excluding the acquisition of HCSS. The Executive Board continues to expect currency-adjusted organic revenue growth in the range of 14% to 15% for financial year 2026, as well as an EBITDA margin between 32% and 33%. Excluding acquisition-related one-off costs, the EBITDA margin would have been at the upper end of the guidance range.

Following the first-time consolidation of HCSS as of July 1, 2026, the Executive Board estimates an additional, currency adjusted contribution to Group revenue growth of around 600 basis points (including the PPA effect) in the financial year 2026. Including acquisition-related one-off costs and therefore starting from the mid-point of the reported EBITDA margin guidance of 32% to 33%, a dilution of around 150 basis points is expected following the HCSS acquisition. This mainly reflects the expected impact of the purchase price allocation (PPA) for HCSS, as well as ongoing integration expenses and recurring expenses related to a newly established share-based compensation program, designed to support and drive value creation in the expanded Build segment over the coming years.

The contribution of the HCSS acquisition in terms of revenue and EBITDA does not yet reflect the full potential. The statements regarding the expected impact of the HCSS acquisition on the 2026 financial year are subject to the finalization of the PPA for HCSS, which is expected later this year. The PPA will be recognized over a period of twelve months and is expected to be front-end loaded, with the majority being recognized during the first six months. Based on preliminary estimates, it is expected to reduce the revenue of HCSS by a mid- to high-twenties million-euro amount in the second half of 2026, with a corresponding impact on EBITDA.

The constant-currency revenue growth in the Media segment for the 2026 financial year is now expected to be in the mid single-digit percentage range, in line with current consensus estimates, reflecting the market environment and ongoing consolidation in the media market, rather than in the high single-digit percentage range as indicated in the segment outlook published in the 2025 Annual Report. The EBITDA margin of the Media segment is now expected to be below the level achieved in 2025, reflecting the weaker-than-expected business performance. In the 2025 Annual Report, the Company had anticipated a slight year-over-year improvement in the segment‘s EBITDA margin. These adjustments have no impact on the Group‘s overall outlook.

These forecasts are based on the assumption that global economic and industry-specific conditions will not deteriorate during the current fiscal year. Furthermore, it is assumed that the current conflict in the Middle East will neither escalate significantly nor persist over an extended period. From today’s perspective, therefore, no material impact on the Nemetschek Group’s earnings, financial, and asset position is anticipated.

Consolidated Statement of Financial Position

Notes to the interim financial statements

The condensed consolidated interim financial statements of the Nemetschek Group have been prepared in accordance with the International Financial Reporting Standards (IFRS), as required to be applied in the European Union, and the interpretations of the International Financial Reporting Interpretations Committee (IFRIC) and of the Standing Interpretations Committee (SIC). These interim financial statements have been prepared in accordance with the requirements of IAS 34.

The interim financial statements as of June 30, 2026 have not been audited and have not undergone an audit. Significant changes to the consolidated statement of financial position, the consolidated statement of comprehensive income and the consolidated cash flow statement are detailed in the report on the earnings, financial and asset situation.

The accounting and valuation policies applied in the condensed consolidated interim financial statements are generally based on the same accounting and valuation policies used as a basis for the consolidated financial statements for the 2025 financial year.

Accounting standards applied for the first time in 2026

The Group has implemented all accounting standards adopted by the European Union that became mandatory for application from January 1, 2026. The amended requirements do not have any material impact on the condensed consolidated interim financial statements of the Nemetschek Group.

Standards issued but not yet applied

In January 2024, the IASB issued the new standard IFRS 18 “Presentation and Disclosure in Financial Statements.” The standard replaces IAS 1 “Presentation of Financial Statements” and introduces comprehensive new requirements regarding the structure of the statement of profit or loss, the aggregation and disaggregation of information, and disclosures related to management-defined performance measures (MPMs). IFRS 18 will be applied by the Nemetschek Group for the financial year beginning on January 1, 2027.

The detailed effects on the consolidated financial statements are currently being assessed. At the date of preparaton of these condensed consolidated interim financial statements, the IFRS 18 implementation project has not yet been completed.

In addition, further new standards and amendments to existing standards and interpretations will become effective for financial years beginning on or after January 1, 2027. The Nemetschek Group is currently evaluating the impact of these requirements on the consolidated financial statements. Based on the current assessment, no material effects on the Group’s net assets, financial position and results of operations are expected.

Financial Instruments

For a detailed overview of other financial instruments and the determination of fair values we refer to the Notes of the Annual Report 2025. With the exception of the EUR/USD forward contract described below, all financial instruments measured at fair value in the balance sheet as of June 30, 2026 are classified as Level 3.

The fair value of the EUR/USD-forward contract related to the foreign-exchange exposure arising from the purchase price obligation of the HCSS acquisition amounts to EUR 7.9 million as of June 30, 2026 and has been recognized within current other financial assets. Accordingly, the other financial incomed increased by this amount. The fair value is determined using commonly accepted valuation techniques that maximize the use of observable market inputs and minimize the use of unobservable inputs in accordance with IFRS 13. The forward contract is classified as Level 2, because the valuation is derived from observable market data.

The change in unlisted equity instruments classified within Level 3 was primarily attributable to acquisitions of EUR 3,286k.

The contingent consideration recognized in connection with the asset deal of Vectorworks, Inc. described in the following section is categorized as Level 3 within the fair value hierarchy. Contingent consideration arising from business combinations is measured using a discounted cash flow approach, under which expected future cash flows are discounted using risk-adjusted discount rates. Changes in fair value are recognized in other financial income or expense. The valuation is based on probability-weighted revenue and earnings metrics, for which an isolated increase would result in a higher fair value.

The net finance result includes realized gains from foreign exchange swaps amounting to EUR 5,395k.

Business Combinations

Below, the Group‘s major business combinations during the first half of 2026 are presented.

Vectorworks, Inc., Columbia, Maryland, USA

Effective as of February 10, 2026, Nemetschek SE acquired the business operations of Morpholio, LLC within the scope of an asset deal. Morpholio has developed a software solution for creative workflows for architecture, design and engineering, complements the Design segment, and strengthens the Nemetschek Group‘s Sketch-to-BIM strategy.

The consideration transferred in cash amounts to EUR 13,966k. Under the purchase agreement, a contingent consideration arrangement was agreed with the sellers. Additional payments of up to EUR 2,690k will be made if certain revenue targets and technical milestones are achieved. At the acquisition date, the fair value of the contingent consideration liability was estimated at EUR 1,686k.

As part of the preliminary purchase price allocation, identifiable intangible assets amounting to EUR 16,419k were recognized. The excess of net liabilites amounts to EUR 767k. Further disclosures required by IFRS 3.B64 were not yet available at the date of preparation of these interim financial statements.

Graphisoft Pty Ltd., Australia und Central Innovation Pty Ltd., New Zealand

On February 25, 2026, Graphisoft SE signed a share purchase agreement to acquire 100% of the shares of two long-term distributor partners: Graphisoft Pty Ltd., Australia, and Central Innovation Pty Ltd., New Zealand. Control was obtained on March 31, 2026. The transaction complements the Design segment and expands the Group‘s direct presence in the APAC region. The consideration transferred in cash amounts to EUR 15,405k, resulting in a net cash outlow of EUR 10,328k.

As part of the preliminary purchase price allocation, customer relationships of EUR 10,695k and corresponding deferred tax liabilities of EUR 3,129k were recognized. The resulting goodwill amounts to EUR 10,351k, while the excess of net liabilites amounts to EUR 2,512k. Further disclosures required by IFRS 3.B64 were not yet available at the date of preparation of these interim financial statements.

ComputerWorks AG, Switzerland and Computer-Works GmbH, Germany

On March 31, 2026, the Nemetschek Group acquired 100% of the shares in ComputerWorks GmbH as well as the CAD business of ComputerWorks AG. Upon obtaining control on May 4, 2026, ComputerWorks GmbH was renamed Vectorworks Germany GmbH and the CAD business was transferred from ComputerWorks AG to the newly established Vectorworks Switzerland AG. The acquisition was undertaken to strengthen Vectorworks’ direct market presence in Europe and complements the Design segment.

The consideration transferred consists of cash and cash equivalents amounting to EUR 55,876k, resulting in a net cash outflow of EUR 48,214k.

As part of the preliminary purchase price allocation, customer relationships of EUR 42,507k and corresponding deferred tax liabilites of EUR 10,085k were recognized. The resulting goodwill amounts to EUR 23,454k. Further disclosures required by IFRS 3.B64 were not yet available at the date of preparation of these interim financial statements.

Equity

Following the approval at the Annual General Meeting in May 2026, a dividend of EUR 78,534k was distributed to the shareholders in the first half of 2026.
